PROJECTS

RateMySchool | *JavaScript, CSS*

February 2024 – May 2024

- Headed a 3-person team to develop a full stack web application enabling users to rate and review universities, encompassing all schools in New York State.
- Integrated MongoDB for backend data routing, employed Bootstrap for front-end styling, and leveraged the Google Search API to retrieve images.

Game Insightify | *Langchain, OpenAI API, Streamlit*

August 2023 – January 2024

- Led a 3-member team to create a video game recommendation chatbot utilizing RAG and data of over 73 thousand games. By inputting the desired game features, the tool dynamically generates a tailored recommendation optimized to the game features.
- Utilized Streamlit for data visualization in the frontend, Langchain to answer over our data, and OpenAI's API for NLP and vector tokenization.

Battleship Game | *Java*

February 2023 – May 2023

- Developed a Java-based Battleship application using Java and JavaFX, as part of a three-person team project.
- Followed software development life cycle standards throughout the project's life cycle.

EXPERIENCE

IT College Assistant

January 2023 – Present

College of Staten Island, City University of New York

Staten Island, NY

- Facilitate comprehensive support for over 500 students and staff in accessing CUNY services, computer resources, and Office365.
- Proficiently address a wide range of hardware and software issues, ensuring smooth functioning of technology resources.
- Collaborate seamlessly with 20+ College Assistants to provide inclusive assistance tailored to the needs of CUNY students and faculty.
